Profile

Young and ambitious python developer, passionate about automation of software. Although I am still young, I have one year of experience in developing and presenting software and designs for its interface. I also have theoretical and practical knowledge in HTML, CSS, JS, Angular, Python, Regular expressions, Django, PHP, MySQL, PostgreSQL, Linux, git and github.

Education

Ninth grade, NPMG, Sofia

SEPTEMBER 2020 — PRESENT

COMPUTER SCIENCE CLASS

My group in school speciazes in software and hardware. I study HTML, CSS and JS at my ICT class and C++ at my Computer Science class. In addition, I have intensive mathematics education on a weekly basis.

PYTHON DEVELOPER, SOFTUNI, Sofia

APRIL 2021 — PRESENT

PYTHON DEVELOPER

- Python Basics
- Information Security Management
- Programming Fundamentals with Python
- Open Source And Threat Intelligence
- Python Web Framework
- Python Web Basics
- System And Network Compromising

PROJECTS AND COMPETIOTIONS

APP FOR SMALL BUSINESS

MARCH 2022 — PRESENT

ECOMMERCE

The project is built on Django. The function of the website is to promote a small startup business and to facilitate online sales and purchases. The business is expected to begin operations in two months and the deadline for the site is a month after the opening. I expect to participate in future ICT competitions with this project.

DJANGO EXAM

APP FOR THE EXAM

This project was originally created for a course from SoftUni on Django. During the course I learnt how to work with Django, PostgreSQL, git and github.

SOFTUNIADA 2022 NATIONAL OLYMPIAD

NOVEMBER 2021 — APRIL 2022

LETS LEARN PYTHON

The project is coded in PHP. I participated in Softuniada 2022 and National ICT Olympiad with it. During the development process I got to know how to work with PHP and MySQL.

SOFTUNIADA 2021

COSMOS AND PEOPLE

This is my first ever website. I presented it on Softuniada 2021 and one additional national competition where I and my team were awarded first place on the category "Web App".
